

MASTER IN WATER ENGINEERING

Cleaner

0.9 Micron Purification

Providing absolutely clean water, GIONO filters block dirt and metal rusts from incoming water source and effectively remove particulates, contaminations, pathogenic bacteria, harmful chemicals and toxic residues etc.

Healthier

Smaller Molecules, Easier For Body Absorption

GIONO activates and ionizes water as well as converts the giant water molecules into small hexagonal clusters. It helps in body detoxification by improving metabolism rate and increase cell energy.

Natural

100% Organic Ingredients

We only use natural purifying materials such as diatomite, coral calcium, coconut shells, bamboo and charcoal base activated carbon etc.

Safer

Chlorine & Heavy Metals Removal

Purify harmful materials and get rid of radioactive elements found in normal water source while keeping minerals vital to human bodies intact. Remove chlorine and all heavy metals (aluminium, mercury & etc)

Tastier

Enjoy The Good Taste Of Every Drop!

GIONO improves the taste of water by removing unpleasant odour and other contaminations. Softens hard water with special resins that are highly effective in biodiesel filtration process.

Product Assurance

International Product Certifications

All GIONO products are certified and accredited by both local and international health and testing bodies.

Higher Tech

Water Filter System

This latest water filter technology applied on our system to process water through higher quality alkaline mineral stones filter and transform the water into healthier alkaline water at it's best anti- oxidant and pH level for drinking.

Beautifying

Rejuvenate Body Cells And Oxidations

GIONO regulates our body pH balance by producing active hydrogen ions to neutralize free radicals in our body. With strong antioxidant properties, we feel younger, more energetic and our skin will even glow more radiantly, naturally!

Convenience

We'll Do It All For You

Our R&D and technical crews understand that most people demand an easy way of getting high quality drinking water. Therefore we strive to prepare a total water treatment solutions , external as well as internal filters, providing the best quality of water to you all the time.

Value-Add & Savings

Product Comparison-Cost & Benefits

There are various kinds of water filters in the market. Please compare the qualities and benefits wisely with the price and product values we can offer you.

10 **REASONS**
FOR YOU
TO CHOOSE
GIONO

WATER TREATMENT SYSTEMS

GIONO WATER FILTRATION SYSTEM

HydroPro **R10**

Nano Negative Hydrogen Ion Alkaline Energy Water Filtration System

This System filters tap water to produce high-quality good tasting alkaline water that generates the best pH balance for human body to consume. GIONO R10 Water Filtration system produce energy alkaline water that is rich in negative hydrogen ions by running through 6 cylinders of natural mineral elements.

Drinking good alkaline water brings many health advantages. Ionized hydrogen water brings extraordinary effect in removing free radicals and prevent oxidative damage,

Highly oxygenated micro-clusters for faster absorption and cell detoxification. The alkaline pH balance can help to neutralize acidic wastes in our body.

DIMENSION 300mm (L) X 225mm (W) X 375mm (H) - 8kg

GIONO WATER FILTRATION POT

HydroPro **X10**

Nano Negative Hydrogen Ion Alkaline Water Filtration Pot

This portable filtration pot is a convenient way to get access to healthy and fresh alkaline water. This System filters tap water through layers of natural mineral stones to produce good tasting energy water that contains the best pH for human body to consume.

GIONO X10 water filtration Pot brings many health properties such as anti-oxidant, highly oxygenated, micro-cluster for faster hydration and the alkaline pH can help to neutralize acidic wastes in our body.

HYDROPRO GN-X10

DIMENSION 300mm (L) X 240mm (W) X 540mm (H) - 3.5kg

What Kind Of Water Our Body Need ?

WATER IS NOT JUST ABOUT FULFILLING OUR THIRSTS

Purchasing a good alkaline water filter that is rich in negative hydrogen ions is significantly cheaper than many other health enhancing options as it a one-time purchase. Consider the cost of supplements, doctor visits and bottled water purchases.

In the long run, the smartest and most natural way is to invest in GIONO filter systems that can give you so many health benefits and keep your body younger. If you are at risk of developing health problems, Why not add another layer of assurance by drinking pure and body enhancing water offered to you by GIONO.

GIONO WATER DISPENSER

Negative Hydrogen Ion Alkaline Energy Water Dispenser

Stylish, Healthier & Convenient

No more monthly fixed rentals and bottled water. Now with GIONO Negative Hydrogen Ion Alkaline Energy 3-in-1 Hot, Cold & Room Temperature Water Dispenser System, you can also enjoy fresh and healthy alkaline water in your home and offices.

Using a direct pipe-in system to process water through 5 high-quality alkaline mineral stones cartridges, it transforms normal water into healthy alkaline water with good anti-oxidant and pH level for drinking. Replacing the needs for bottled water dispensers currently used in most offices.

Flexi Filter Tap

Complement with GIONO water dispensers, this well-designed brass chrome filter tap allows you to fill up oversize containers and enjoy water with high negative hydrogen ions.

GIONO OUTDOOR FILTER

PUREFIL 7-Hole PVC UF Membrane Outdoor Filters

This new and powerful GIONO 7-Hole outdoor filtration system comes with 50 % more filtration surface and higher flow rate. Highly durable PVC UF membrane technology for high pressure applications and strong temperature resistant. With nice and newly designed 304 grade stainless steel housing. This system is suitable for wide pH range and preserves good minerals without the fragile fibre breakage occurrences of many other old systems.

MODERN & DURABLE OUTER CASING DESIGN

Using robust SUS 304 stainless steel outer casing which is ultra-durable under all kinds of weather conditions. It will not crack or leak even after a long period of usage. Modern and functional design which is appealing and elegant.

PRACTICAL & USER-FRIENDLY

Sensible design with only 2-step functions :-

(1) BACKWASH (2) FLUSHING

Easy for users to carry out the routine backwashes and maintenance works.

PUREFIL GN-E800 - Suitable for small household

DIMENSION 800mm (L) X 230mm (W) X 165mm (H) - 12kg ■ Flow Rate 2500L/hour ■ Max. Working Pressure 5 Bar
Connector Type 3/4"

PUREFIL GN-E1000 - Suitable for medium to big household

DIMENSION 960mm (L) X 230mm (W) X 165mm (H) - 13kg ■ Flow Rate 3000L/hour ■ Max. Working Pressure 5 Bar
Connector Type 3/4"

Latest GIONO 7-Hole PVC UF Membrane Outdoor Filter Advantages

Using food-grade anti-microbial 7-hole filtration membrane, the compression strength is 3 times higher than the normal films. The anti-bacterial properties is 2.5 times better than normal traditional filters. Average life span is at least 3 to 5 years, depending on the household usage.

GIONO New PUREFIL
7-Hole PVC UF Membrane
Outdoor Filter

Convention Outdoor Filter
Membrane

EACH UF MEMBRANE HAS 7 INLET HOLES

Effectively increase the speed of processing filtered water

The 7-hole PVC UF membrane design enhances the dispersion of water pressure, hence the lifespan is much longer

The wall of this new UF membrane is much thicker than the traditional models, making it much more robust and durable

THE MEMBRANE IS FABRICATED USING FOOD-GRADE POLYVINYL CHLORIDE (PVC)

Highly resistant to corrosion caused by acidic or alkaline mediums

The wall of the UF membrane is highly elastic and stretchable enable it to withstand up to 5 bar (75psi) of water pressure

High resistance to heat and deterioration

EACH UF MEMBRANE HAS 1 INLET HOLE

Processing of water filtration is slow

The single-hole design cannot withstand high pressure resulted in rupture and disintegration over time

The membrane's wall is thin, likely to cause rupture and blockage

FABRICATED BY POLY ACRYLONITRILE (PAN)

Non-resistant to corrosion caused by acidic and alkaline mediums

The wall of the membrane has limited elasticity, therefore can only withstand 1-3 bar (15-45psi) of water pressure

Non-resistant to heat, deteriorates easily
